

Petr ŠIMČÁK

Tech Lead & Software Developer

ABOUT ME

Tech Lead at AI Camp and software developer who came to technology from theatre and film. I am interested in how AI changes the way people work and organisations operate. I look for the balance between speed and quality – efficiency that does not sacrifice the result. I combine technical thinking with communication and presentation skills, and I enjoy most turning ideas into things that work.

WORK EXPERIENCE

Tech Lead | AI Camp

2026 – present

- Tutoring and supporting clients from large companies in using LLMs and other AI technologies efficiently and creatively.
- Responsible for maintaining and developing the AI Camp curriculum and internal tools.

Hitchhiker | 42 Prague

2026 – present

Representing the school and its values at events, supporting new students and taking responsibility for a fair study process for others.

3D Printer Maintenance | BUT Brno, 42 Prague

2022 – present

Assembled a 3D printer at BUT and later ran, maintained and supported the 3D printers at 42 Prague.

Film Actor | Czech, German and US productions

2013 – 2021

Roles in films and TV series in several languages; lead role in *To See the Sea* (2014). Long-term collaboration in demanding productions, working under pressure and discipline. [IMDb](#)

Theatre Actor | Brno City Theatre

2009 – 2015

Seven productions from the age of eight, including one of the lead roles in the musical *Mary Poppins*. [Theatre profile](#)

SELECTED PROJECTS

Škoda Hackathon – 3rd place | Team Lead / Backend

2025

Led team B3R Brigade, which built a working application for internal talent search and mobility at Škoda Auto during the hackathon, covering both the employee and the HR perspective (FastAPI, React, Docker, SQLite).

ft_transcendence | FastAPI, React, Docker, PostgreSQL

2026

Team-based full-stack web application: an audiobook marketplace with audio streaming. [GitHub](#)

ft_irc | C++98, sockets, poll

2026

IRC server for hundreds of users, developed in a team of three; my main contribution was the server structure and IRC commands. [GitHub](#)

Cub3D | C, MLX42

2025

Simplified raycasting engine in the style of Wolfenstein 3D. [GitHub](#)

EDUCATION

42 Prague | software engineering

2023 – 2026

Project-based curriculum built on peer learning (2024–2025 at 42 Heilbronn). Projects include minishell and Inception: Unix processes, shell logic, containerisation and deployment. [GitHub](#)

Brno University of Technology | BSc, Sport Technology

2020 – 2025

Thesis *Heart Rate Estimation from PPG Signals* (Python): comparison of heart-rate estimation methods for physiological signals and automatic signal-quality assessment. [GitHub](#)
